

Enjoy personalized support, service, and training from our qualified staff.

While the tremendous advantages of Accounting Relief should now be obvious, you may have concerns about migrating from your existing accounting system. Rest assured that we'll make upgrading to Accounting Relief far easier than you think. We'll do it all for you, including setting up the system, customizing it, and migrating your current data.

We'll then offer personalized training on the system for you and your staff. While the premise of Accounting Relief is revolutionary, the system works so much like other accounting programs that it should take very little time to learn. By investing just a little time at the start, you'll save a lot of time later, and help yourself manage your business finances more efficiently than ever.

And if you have any questions, you'll receive the same timely and courteous personal support from our firm as you always have.

The Bottom Line

By using the power of the Internet, we can offer you a financial management system that eliminates the problems you currently face in managing your business finances and offers you the many remarkable benefits you've been longing for. As your trusted advisor, we will do what you hired us for—continually finding new ways to help you manage your business finances more efficiently, effectively and easily, and providing you with the advisement you need to grow your business.

To learn more about this new system that takes our accounting service to the next level, please call our office to schedule an appointment.

Top 7 Reasons to use Accounting Relief

1. Simplify your finances with a system designed just for you.
2. Don't work all by yourself. Work with us, with our full support.
3. Never again hassle with maintaining an in-house accounting system.
4. Manage your cash flow effectively.
5. Work from anywhere, any time.
6. Eliminate the nuisance of getting your accounting data to us.
7. Never worry about losing your crucial accounting data.

Introducing...

Accounting Relief

A new, enhanced accounting service to make managing your business finances a breeze.

As your accounting firm, we are continually seeking new ways both to enhance the quality of the services we offer, and to help you manage your business finances easily and efficiently.

We are pleased to offer a new breed of web-based accounting services that we believe will greatly enhance our client services, while offering you many remarkable benefits.

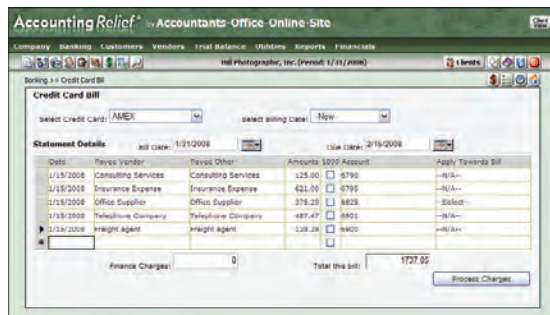

What's different about Accounting Relief?

Unlike any other accounting systems, Accounting Relief lets us work with you as a team—a simple transformation offering far-reaching benefits you can't afford to miss.

Benefits you'll realize:

- **Simplify your finances with a system designed just for you.**

Whatever your needs, we'll design a financial management system just for you. If you want to shield yourself from all the details of accounting, we'll set up a system that's as simple as writing checks and entering deposit slips—while we do everything else behind the scenes for you. If you require a full-blown accounting system with accounts receivable, accounts payable, bank reconciliation, and more - that's what you'll get. And we'll modify the system for you as your needs change.

The "Pay By Credit Card" feature lets you enter your credit card statements quickly and easily.

With Accounting Relief you're never burdened by unwanted features that make your bookkeeping complex and time-consuming. Instead, you get a financial management system that's simple, efficient, and fun to use.

- **Don't work all by yourself. Work with us, with our full support.**

Accounting Relief is a unified system that lets us work collaboratively as a team. By working closely with you, we can be more vigilant in identifying any difficulties you might be experiencing while using the system, so we can correct the situation immediately. You'll always have our guidance and support when you need it. Anytime you need any assistance, we can easily walk you through the system right from our office, as we can see exactly what you see.

- **Never again hassle with maintaining an in-house accounting system.**

You know what we mean. Maintaining an in-house system is costly, time-consuming, and frustrating. With Accounting Relief, we take care of all the system maintenance and upgrades. With all the issues you've got to deal with in your business every day, who needs one more burden?

The Activity Center gives you a quick overview of your finances.

- **Manage your cash flow effectively.**

To run your business efficiently, you need an accurate picture of your financial situation. With traditional methods, by the time we get your data and complete our work, your fiscal situation may have changed. With Accounting Relief, everything is in real time, making it easy for us to provide the fiscal information you need to manage your cash flow most effectively. Plus, you can access your current financials any time you want.

- **Work from anywhere, any time.**

Because Accounting Relief is web-based, you can access it anywhere an Internet connection is available. Work from home or the office at your convenience, and keep tabs on your business finances even while on vacation or on the road.

- **Eliminate the nuisance of getting your accounting data to us.**

No matter how you get your accounting data to us, chances are you find it an unbearable burden. No more. Since Accounting Relief is web-based, your data is stored on highly-secure servers that we can access whenever we need to perform our professional work for you.

- **Never worry about losing your crucial accounting data.**

You're under constant pressure to protect your crucial accounting data. Unless you're one of the lucky few who have never been hit by viruses, hard disk failure, or system crashes, you know restoring a system is a nightmare even if you back up regularly. Accounting Relief gives you the peace of mind that your data is as safe and secure as humanly possible. For details see below!

Ensuring the security and privacy of your data is paramount to us.

The system uses one of the most sophisticated security systems available today—128-bit SSL encryption, the same encryption protocol that banks, financial institutions, and governments use to encrypt and transmit data. To prevent unauthorized access, the servers are firewall-protected and monitored with sophisticated intrusion detection devices. Furthermore, to make sure your data files are physically safe, servers are located in a highly-secure data center facility with a high level of hardware redundancy.
